

**FISCAL NOTE**  
**SB 362 - HB 1276**

February 15, 2001

**SUMMARY OF BILL:** Requires the Department of Safety to provide with each driver license application and renewal application a statement for the driver to certify whether or not they are willing to make an anatomical gift. The statement must be completed before the license may be issued or renewed. Specifies that a "Y" shall be superimposed on the back of the license of an applicant certifying a willingness to make an anatomical gift and such applicant must check the appropriate boxes for the type of gift made. An "N" shall be superimposed on the back of the license for those choosing not to make an anatomical gift.

**ESTIMATED FISCAL IMPACT:**

**Increase State Expenditures - Less than \$100,000**

Estimate assumes a sticker can be utilized on the back of the driver license to fulfill requirements of this bill and can be accomplished with an increase in state expenditures less than \$100,000.

**NOTE:** If the bill requires variable backside printing to accomplish the requirements of this bill, the current driver license issuance system cannot accommodate such printing under the current contract. The Department of Safety indicates such variable printing at this time will result in a one-time increase in expenditures for driver license Polaroid printer upgrades and programming costs estimated to cost \$180,000. The current contract with the driver license printer vendor expires in February 2002 and plans for the new contract include the backside printing capability necessary to accommodate imbedded printing of the "Y" or "N" required by the bill. If the effective date of the bill were delayed until the new contract could take effect, there would be no additional cost to the state for this process.

**CERTIFICATION:**

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.

James A. Davenport, Executive Director
